

## Initial Order Commitment for nbn's Fibre-to-the-Curb Project

**10 February 2017 (Sydney):**

**NetComm Wireless Limited (ASX: NTC)**, a leading global provider of data communication technology, is pleased to announce that it has received its first order commitment from nbn.

nbn, the Government owned enterprise rolling out Australia's national broadband network, appointed NetComm Wireless as its provider of 4-port Distribution Point Units (DPUs) to be used to deliver the nbn™ Fibre-to-the-Curb (FTTC) project. This initial order commitment will generate approximately \$28 million revenue to NetComm upon delivery to nbn, which is expected to occur during the period June to August 2017.

As is customary, this initial order commitment is subject to successful readiness review testing by nbn, which is scheduled for April. NetComm Wireless' DPUs have been specifically designed to be installed in the telecommunications pits or on power poles outside premises. They connect fibre to a household's existing copper lines providing very high speed broadband.

Commenting on this initial order commitment, Acting CEO Mr Ken Sheridan said: "NetComm Wireless' receipt of this initial order commitment from nbn is a very positive start to our execution of this significant contract, and builds on our strong existing relationship with nbn. We expect to quickly move to a monthly supply of Distribution Point Units as the nbn ramps up its installation of this new technology."

"The delivery of our Distribution Point Unit telecommunications technology to the nbn is a substantial contract for NetComm Wireless and will provide a material revenue stream to the Company. This complements our existing Fixed Wireless technology for nbn that is already helping Australians in regional and semi-rural areas gain access to high speed broadband. We hope to export our DPU technology overseas, just as we have been able to do with the fixed wireless solution we built for the nbn" added Mr Sheridan.

NetComm Wireless expects to announce its 2017 half year financial result on Friday 24 February 2017.
